

Solar System - Extreme Exploration Workshop

Saturday, November 3, 2007 • 8:00 a.m. - 3:00 p.m.

Exploring the Solar System

Space Science Activities for Informal Educator Settings

Join other Informal Educators in a free workshop at the Virginia Air & Space Center.

Informal Educators will engage in a variety of fun activities that will help them share space science exploration concepts and the excitement of NASA robotic missions with their students. Workshop topics include recent Mars exploration, comets, solar system scales, and active comparisons of Earth, Moon, Mars landforms. These inexpensive, hands-on, introductory activities can be used for many different activities with your students. Space scientists and education specialists will share updates on current and upcoming NASA missions. Participants should come ready to participate in the fast-paced activities and have fun.

There is no cost for this workshop.

Light refreshments will be provided and a box lunch will be available for purchase; choices are Buffet Ham or Roast Turkey with Swiss cheese. Cost for lunch is \$7.50, place your lunch order when reserving your space. You are welcome to bring your own lunch.

SPACE QUEST

Exploring the Moon, Mars & Beyond

Presenting partner: Langley Federal Credit Union

After the workshop stay and enjoy our new space gallery, **Space Quest: Exploring the Moon, Mars & Beyond**, and traveling exhibit **Football!**

For more information on the workshop, please contact Ivelisse Gilman at Ivelisse.R.Gilman@nasa.gov and to register for the workshop please contact: Swee Hart at shart@vasc.org

Registration ends October 31, 2007
